Software Engineer

Experiences

May 2023 – July 2026, Software Developer / **Freelance**

- Development and maintenance of platforms, web applications, and websites.
- End-to-end management of projects, covering planning, requirements analysis, task prioritization, coordination, development, deployment, monitoring, and delivery.
- Continuous enhancement, deployment, and technical support of solutions based on client requirements.
- Development and customization of websites and web solutions.
  Mission:

    - Managed projects across all stages of their lifecycle, from initial requirements gathering and planning to development, testing, deployment, maintenance, and delivery.
    - Coordinated technical activities, priorities, timelines, client communication, and project follow-up to ensure successful delivery.
    - Development, maintenance, and enhancement of web applications using NestJS and React JS, ensuring scalability, reliability, performance, responsiveness, functionality, and code quality.
    - Design and implementation of new features, REST APIs, and third-party service integrations according to technical and functional requirements.
    - Development, customization, and maintenance of Shopify websites, including code updates, theme customization, feature enhancements, and content management.
    - Managed source code and collaborative development workflows using Git and GitHub.
    - Analyzed technical and functional requirements and collaborated with clients to provide tailored solutions and ongoing technical support.
    - Provided ongoing technical support, troubleshooting, maintenance, and implementation of updates and changes requested by clients.
    - Deployed and managed applications and ensured their ongoing availability and performance.

Environment:

NestJS, React JS, Java, Git, GitHub, REST API, TypeScript, JavaScript, Shopify, Liquid, HTML5, CSS3

April 2021 - June 2022, Java Developer / **XPI (Expanded Payment International) - Morocco**

- Maintenance of Card24 Project (electronic payment systems, EMV card processing).
- Development of GTX project.
  Mission:

    - Work in a multidisciplinary and agile team while ensuring deadlines and high code quality standards Overhaul of old systems
    - Development, integration and maintenance of electronic payment systems, EMV card processing and flow.
    - Collaborated with the engineering team that released a digital payment system (CARD24), adopted by many banks and Microfinance institutions around the world.
    - Managed, optimized, and updated databases schema as necessary using Java EE, SQL, Hibernate, Oracle, and SQL Server.
    - Assistance with workshops and analysis of technical and functional needs.

Environment:

Java EE, Angular 8, Hibernate, PostgreSQL, HTML5, CSS3, JavaScript, Tomcat, Rest, JSON, XML

December 2020 – April 2021, internship / **PH SOLUTION - Morocco**

- Design, realization and taking responsibility for an PHP web application for our client in the purpose of booking places such as an Animal Farms and premises in villages
- Creating web sites using Wordpress

Mission:

- Conception, Implementation and developing new modules
- Working with CMS tech to develop web sites

Environment:

PHP, PostgreSQL, Wordpress, JavaScript, HTML5, CSS3

January 2020 - February 2020, internship / **LYDEC - Morocco**

- Helping in the Optimization of the web application (Front-End)

Environment:

HTML, CSS, Javascript

Strong knowledge of Object-Oriented design and core programming concepts

Technical & Skills

- **Programming language :** JAVA,PHP, C#.
- **Web**: Java EE, SpringBoot, Asp.net, Laravel, Web API, MVC 5, Web Forms, HTML5, CSS3, JavaScript, Angular, ReactJs, NestJS, jQuery, Bootstrap, Wordpress, Shopify, Liquid.
- **Architecture & Design Pattern**: Microservices, MVC, Rest API, Repository, Spring Boot, Hibernate, Clean Architecture (Microservices + Monolithique).
- **CRM:** Salesforce Administrator.
- **Methodologies & Tools**: UML, Scrum, Kanban.
- **Database**: SQL Server, NoSql, PostgreSQL.
- **Environments**: Intelij Idea, Git, GitHub, PhpStorm, Visual Studio.

About me

Aware of the innovations that are changing our consumption patterns. Curious, lucid and reactive, I give substance to the projects entrusted to me to guide reflection around performance. I want to invest my energy and my skills in a business adventure. I will be delighted to discuss with you.

Soft skills

Good communication, good time management that includes the ability to work under own initiative and under tight time pressures - planning, prioritizing, and controlling own workload.

Self-directed learning - Continuous improvement - Inquisitive - self teaching of relevant new business thinking and technology solutions.

I'm a strong believer in the power of collaboration in coding. Working with others helps to develop ideas, create new solutions, and build something that is much bigger than any individual can achieve alone.

Study & Degree

2025-2026 Master of Business Administration (MBA) from WESFORD Clermont Business School

2025-2026 Master's Degree in Software Engineering, from SUPEMIR – Engineering School

2020-2021 Bachelor's degree in software engineering, from FST SETTAT

2018-2020 Degree in computer development, from Institute of Management and Computer Science (ISGI) - Casablanca

2017: Moroccan Baccalaureate Option: Physics and chemistry.
